Allowance of Application # 09/635,116

1. The following communication is in response to applicant's filing of a Terminal Disclaimer on 19-February-2003. This application is a Continuation of application 09/524,088, filed on 13-March-2000, now U.S. Patent No. 6,516,293.

Reasons for Allowance

2. The following is an Examiner's Statement of Reasons for the indication of allowable subject matter. The instant application is directed to a nonobvious improvement over the methods described in the articles by Ma Dekun et al., entitled "The Computer Simulation of the Interaction Between Roller Bit and Rock", paper no. 29922, Society of Petroleum Engineers, 1995; and "The Operational Mechanics of the Rock Bit", Petroleum Industry Press, 1996. The improvement comprises a method for optimizing a design of a roller cone drill bit; wherein a bit drilling through a selected earth formation is simulated; wherein at least one design parameter of the bit, selected from the group of the number of cutting elements on each one of a plurality of roller cones, cutting element type, and the number of rows of cutting elements on each one of the plurality of roller cones, is adjusted; wherein the simulated bit drilling and adjusting is repeated until an optimized design is determined. This patentable distinction is included in each of the independent claims 1, 5, 10, 16 and 23-27. The art of record fails to teach, suggest, or render obvious <simulated optimization of a roller cone drill bit design> having the corresponding structure which is disclosed in the specification and equivalents thereof at least at <page 6, line 17 through page 28, line 13,

In re Application of: HUANG et al.

and Figures 1-11B>. The Examiner respectfully notes section 1.2, page 17, in the Dekun et al. article, "The Operational Mechanics of the Rock Bit", wherein the author states that all of the intermediate relationships between the bit design and the bit performance are not expressed in that article, and specifically mentions "the ratio between the rotary speed of the cone and the bit". In view of the foregoing, the claims of the present application are found to be patentable over the prior art.

DATE MAILED: 03/11/2003

Notice of Fee Increase on January 1, 2003

If a reply to a "Notice of Allowance and Fee(s) Due" is filed in the Office on or after January 1, 2003, then the amount due will be higher than that set forth in the "Notice of Allowance and Fee(s) Due" since there will be an increase in fees effective on January 1, 2003. See Revision of Patent and Trademark Fees for Fiscal Year 2003; Final Rule, 67 Fed. Reg. 70847, 70849 (November 27, 2002).

The current fee schedule is accessible from: <http://www.uspto.gov/main/howtofees.htm>.

If the issue fee paid is the amount shown on the "Notice of Allowance and Fee(s) Due," but not the correct amount in view of the fee increase, a "Notice to Pay Balance of Issue Fee" will be mailed to applicant. In order to avoid processing delays associated with mailing of a "Notice to Pay Balance of Issue Fee," if the response to the Notice of Allowance and Fee(s) due form is to be filed on or after January 1, 2003 (or mailed with a certificate of mailing on or after January 1, 2003), the issue fee paid should be the fee that is required at the time the fee is paid. If the issue fee was previously paid, and the response to the "Notice of Allowance and Fee(s) Due" includes a request to apply a previously-paid issue fee to the issue fee now due, then the difference between the issue fee amount at the time the response is filed and the previously paid issue fee should be paid. See Manual of Patent Examining Procedure, Section 1308.01 (Eighth Edition, August 2001).

Questions relating to issue and publication fee payments should be directed to the Customer Service Center of the Office of Patent Publication at (703) 305-8283.
